RAISING THE BAR

HIGHER EDUCATION & SUSTAINABILITY IN TENNESSEE: RAISING THE BAR

On April 1 - 2, 2008, The Tennessee Pollution Prevention Roundtable Committee on Higher Education will host its 3rd annual conference advancing environmental stewardship. Held on Lipscomb University's campus, this conference will highlight sustainability initiatives taking place on Tennessee campuses and present strategies for putting programs in place.

Come and find out how higher education institutions are *Raising The Bar* on meeting their sustainability obligations!

CONFERENCE HISTORY

In 2006, Fisk University hosted the first conference. Over 120 attendees from 23 institutions in Tennessee came together to share experiences and discuss building sustainable environmental ethic on campuses. Last year Belmont University hosted over 170 students, staff and faculty from 22 higher education institutions and continued to explore moving toward campus sustainability.

THIS YEAR

The 2008 Conference at Lipscomb University will carry on the quest to explore and share ways to maintain ecological balance throughout Tennessee's higher education institutions. Presentations will include national speakers as well as individuals from Tennessee higher education institutions.

As in years past, the conference will be organized around three separate tracks, designed to satisfy the different interests on campuses.

They are:

- Campus Operations
- Instruction and Curricula
- Energy and Climate Change

Topics within the tracks will include:

- Building to LEED (green) Standards
- Energy Conservation and Materials Recycling
- Service Learning Opportunities
- Climate Change Commitments and Reporting
- Voluntary EPA Compliance Program (Roundtable Discussion)

DON'T MISS

A tour of the geothermal heating and cooling system in Lipscomb University's Ezell building

SPONSORSHIP & EXHIBITS

Opportunities for sponsorship and exhibiting at the Conference are available.
